

Why Use Indy QRC?

In support of our network of regional distributors and authorized repair centers, and as a complement to their own extensive in-house capabilities, the Indy QRC offers OEM quality pump service and repairs.

Backed by the full engineering, design and manufacturing resources of Peerless Pump Company; in combination with our dedicated repair center, we can remanufacture, repair or upgrade your pump to meet or exceed the original specifications. This at a cost that; in most cases, is significantly less than the price of a new pump.

To further assure pump performance, a Hydraulic Institute (HI)-certified flow analysis can be performed as an integral part of the pump repair specification or as a stand-alone service.

Be sure to check out our Capabilities page for additional information about all the resources available. Further information can be given by contacting your local Peerless Pump distributor.

Vertical Turbine Pump Re-bowling Capabilities

Quick Response Center offers complete bowl replacement for ANY make of vertical turbine pump

Rebowling Program

- Re-bowling a vertical turbine pump consists of fitting a new bowl assembly on any manufacturer's vertical pump.
- The Service Center has a RAPID product selection program that ensures your original hydraulic performance conditions are met or exceeded.
- Re-bowled vertical turbine pumps are guaranteed to perform hydraulically at the specified conditions of service.
- We will do everything to accommodate your desired delivery schedule.
- Performance testing is also available in our ISO9000 test lab to H.I. standards.
- Current models are readily available
- The Service Center will tear down, inspect your entire pump, and supply a failure analysis report to you with our recommendations and final price quotation.

Benefits

- Reduces operating costs
- Provides system hydraulic upgrading to OEM tolerances
- Improves efficiency performance
- New pump warranty on bowl assembly
- Material upgrades are available for corrosion, abrasion and/or cavitation
- No change in piping or driver
- Mechanical solutions to issues such as reduced bearing spans, increased shaft size and/or new register alignments

Why QRC

Our Capabilities
Expert Repair
Pump Parts
Engineered Systems
Certified Testing

We look forward to serving you.

Our Capabilities

Our Indianapolis, Indiana Quick Response Center is equipped to handle all your specialized repair needs.

- Overall IndyQRC Capabilities
- Vertical Turbine Pump Re-Bowling Capabilities
- Peerless Legacy Pump Capabilities

Service Center

- In-House Repair to ANY Brand Name Centrifugal Pump
- Quick Response to Emergency Repairs
- Detailed Tear Down Inspection Report
- Certified Hydraulic & Performance Testing to ISO9001 & HI Standards
- Integrated Machine Shop with CNC Capabilities
- Dynamic Balancing
- Vertical Turbine Re-Bowling Program
- Pump Upgrade Recommendations
- Metallurgical Analysis
- Pickup and Delivery Available

Parts Inventory

- 24 Hours Emergency Service
- Most parts available for immediate shipment
- Quick Ship Shafting Program
- Credit Card Sales

Our experienced and qualified repair experts will get your pump back online and back to factory specs.

Field Service

- Emergency Service
- Worldwide On-Site Repair by Certified Technicians
- Scheduled maintenance during plant shutdowns with quick turnaround
- Installation / Start-Up / Commissioning
- System and Flow Analysis Performance Certification
- Diagnostic Surveys & Troubleshooting
- Fire Pump Annual Re-Certification
- Vibration Analysis
- Preventative Maintenance Contracts
- Laser Alignment
- Inventory Analysis
- Maintenance Training
- Extended Warranties (Up to 3 years)
- Root Cause / Failure Analysis

Benefits

- Economic Repair Instead of Potentially Costly Replacement
- Decreased Downtime
- Extends The Life By Upgrading Metallurgy & Re-Surfacing
- Reduced Operating Cost
- Current Engineering Systems & Processes Technology
- Complete Records On All Pumps Supplied / Repaired by Peerless
- Engineering Consulting Support
